***Election/Restriction***

1. An election of species I (claim 13) without traverse is acknowledged. Claims 14-17 are withdrawn from consideration.

***Claim Rejections - 35 USC § 112***

2. Claims 12-13, 18-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, line 14, "the film carrier" lacks antecedent basis.

*\* Claim 20 is treated as dependent to claim 19 ("said diffusion sheet").*

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 12-13, 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamauchi et al (US 5745202).

Yamauchi discloses a liquid crystal display (LCD) device comprising: a liquid crystal panel comprising liquid crystal layer (cells); a first substrate 112 disposed on a displaying side of the liquid crystal (LC) layer, and a second substrate 117 disposed on a reverse side of the LC layer; a liquid crystal driver 130 electrically connected with the liquid crystal panel through a circuit pattern (see Figure 4); a light shielding material 10/11/12 disposed adjacent the liquid crystal driver so as to prevent outer light from being incident to the liquid crystal driver (see Figures 5-6); one end of the liquid crystal panel is located on a film carrier 210 and the end is covered with a light shielding film 180 extending from the liquid crystal panel to the film carrier (see Figures 5-6).

Per claim 13, see Figure 6.

Per claim 18, see col. 1, lines 15-17.

#### ***Allowable Subject Matter***

5. Claims 19-22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
